**TEXTBOOK REVIEW FORM – Psychology (STANDARDS)**

*High School Elective Course - Psychology - Students will:*

<table>
<thead>
<tr>
<th>1. Trace the development of psychology as a scientific discipline evolving from other fields of study.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>•</strong> Describing early psychological and biological inquiries that led to contemporary approaches and methods of experimentation, including ideologies of Aristotle, John Locke, Wilhelm Wundt, Charles Darwin, William James, Frantz Fanon, and G. Stanley Hall</td>
</tr>
<tr>
<td><strong>•</strong> Differentiating among various modern schools of thought and perspectives in psychology that have evolved since 1879, including each school's view on concepts of aggression or appetite</td>
</tr>
<tr>
<td><strong>•</strong> Illustrating how modern psychologists utilize multiple perspectives to understand behavior and mental processes</td>
</tr>
<tr>
<td><strong>•</strong> Identifying major subfields and career opportunities related to psychology</td>
</tr>
</tbody>
</table>

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

---

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

---

Portions of the standard that are missing or not well developed in the instructional material (if any):

---

Rating: 
2 - Meets Criterion for Standard (90%-100% (merit))
1 - Partially Meets Criterion for Standard (89%-70% (recommend with reservation))
0 - Does Not Meet Criterion for Standard (69%- 0% (not recommended))

---

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
2. Describe research strategies used by psychologists to explore mental processes and behavior.
   - Describing the type of methodology and strategies used by researchers in different psychological studies
     Examples: surveys, naturalistic observations, case studies, longitudinal studies, cross-sectional studies
   - Comparing independent, dependent, and confounding variables and control and experimental groups
   - Identifying systematic procedures necessary for conducting an experiment and improving the validity of results
   - Describing the use of statistics in evaluating research, including calculating the mean, median, and mode from a set of data; conducting a simple correlational analysis using either calculators or computer software; and explaining the meaning of statistical significance

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

---

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

---

Portions of the standard that are missing or not well developed in the instructional material (if any):

---

Rating: 2 - Meets Criterion for Standard
90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard
69%-0% (not recommended)

---

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
3. Explain how processes of the central and peripheral nervous systems underlie behavior and mental
   • Describing how neurons communicate, including the role of neurotransmitters in behavior and the electrochemical process
   • Comparing the effect of drugs and toxins on the brain and neurotransmitters
   • Describing how different sections of the brain have specialized yet interdependent functions, including functions of different lobes and hemispheres of the cerebral cortex and consequences of damage to specific sections of the brain
   • Describing different technologies used to study the brain and nervous system
   • Analyzing behavior genetics for its contribution to the understanding of behavior and mental processes, including differentiating between deoxyribonucleic acid (DNA), chromosomes, and genes; identifying effects of chromosomal abnormalities; and explaining how genetics and environmental factors work together to determine inherited traits

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating: 
2 - Meets Criterion for Standard 90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard 69%- 0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
4. Describe the interconnected processes of sensation and perception.
   - Explaining the role of sensory systems in human behavior, including sight, sound, smell, touch, and pain
   - Explaining how what is perceived can be different from what is sensed, including how attention and environmental cues can affect the ability to accurately sense and perceive the world
   - Describing the role of Gestalt principles and concepts in perception

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating: 
2 - Meets Criterion for Standard
90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard
69%-0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
5. Explain ways to promote psychological wellness.
   - Describing physiological processes associated with stress, including hormones associated with stress responses
   - Describing Hans Selye’s general adaptation syndrome (GAS)
   - Describing the flight-or-fight response in terms of the autonomic and somatic nervous systems
   - Contrasting positive and negative ways of coping with stress related to problem-focused coping, aggression, and emotion-focused coping
   - Explaining approach-approach, approach-avoidance, and avoidance-avoidance conflicts
   - Identifying various eating disorders and conditions
     Examples: anorexia nervosa, bulimia nervosa, obesity

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating:  
2 - Meets Criterion for Standard  
90%-100% (merit)  
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)  
0 - Does Not Meet Criterion for Standard  
69%- 0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
6. Describe the physical, cognitive, and social development across the life span of a person from the prenatal through aging stages.
   - Outlining the stage-of-development theories of Jean Piaget, Erik H. Erikson, Sigmund Freud, Carol Gilligan, and Lawrence Kohlberg

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating: ________
2 - Meets Criterion for Standard
90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard
69%–0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
TEXTBOOK REVIEW FORM – Psychology (STANDARDS)

High School Elective Course - Psychology - Students will:

8. Describe ways in which organisms learn, including the processes of classical conditioning, operant conditioning, and observational conditioning.
   - Identifying unconditioned stimuli (UCS), conditioned stimuli (CS), unconditioned responses (UCR), and conditioned responses (CR)
   - Describing the law of effect
   - Describing original experiments conducted by B. F. Skinner, Albert Bandura, Ivan Pavlov, John B. Watson, and Rosalie Rayner
   - Differentiating between reinforcement and punishment, positive and negative reinforcement, and various schedules of reinforcement
   - Describing biological limitations on operantly conditioned learning
   - Differentiating between observational learning and modeling
   - Analyzing watching violent media for effects on violent behavior

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating: ___
2 - Meets Criterion for Standard 90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard 69%-0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
9. Describe how organisms think and solve problems, including processes involved in accurate thinking.
   • Identifying the role of mental images and verbal symbols in the thought process
   • Explaining how concepts are formed
   • Differentiating between algorithms and heuristics
   • Analyzing different types of heuristics to determine effects on problem solving

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material
(if any):

Rating: __________
2 - Meets Criterion for Standard
90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard
69%-0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
TEXTBOOK REVIEW FORM – Psychology (STANDARDS)

High School Elective Course - Psychology - Students will:

10. Describe the qualities and development of language.
   - Identifying common phonemes and morphemes of language
   - Describing how understanding syntax and grammar affect language comprehension
   - Demonstrating how qualities of sign language are similar to spoken language
   - Describing how infants move from babbling to usage of complete sentences
   - Explaining how hearing loss in infants and children can affect the development of spoken language

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating:
2 - Meets Criterion for Standard 90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard 69%-0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
### High School Elective Course - Psychology - Students will:

<table>
<thead>
<tr>
<th>11. Compare various states of consciousness evident in human behavior, including the process of sleeping and dreaming.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Explaining states of sleep throughout an average night’s sleep, including nonrapid eye movement (NREM) and rapid eye movement (REM)</td>
</tr>
<tr>
<td>• Describing the mechanism of the circadian rhythm</td>
</tr>
<tr>
<td>• Evaluating the importance of sleep to good performance</td>
</tr>
<tr>
<td>• Comparing theories regarding the use and meaning of dreams</td>
</tr>
<tr>
<td>• Analyzing the use of psychoactive drugs for effects on people, including the mechanisms of addiction, withdrawal, and tolerance</td>
</tr>
<tr>
<td>• Evaluating the phenomenon of hypnosis and its possible uses</td>
</tr>
</tbody>
</table>

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

**MAP ICONS** are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
12. Describe the role of motivation and emotion in human behavior.
   - Identifying theories that explain motivational processes, including cognitive, biological, and psychological reasons for motivational behavior, and Abraham Maslow's hierarchy of needs and arousal theory
   - Describing situational cues that cause emotions, including anger, curiosity, and anxiety
   - Differentiating among theories of emotion
   - Identifying universally recognized emotions

Rating:
2 - Meets Criterion for Standard 90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard 69%- 0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
13. Describe methods of assessing individual differences and theories of intelligence, including Charles E. Spearman’s general (g) factor of intelligence, Howard Gardner’s multiple intelligences, and Robert J. Sternberg’s triarchic theory of intelligence.
   - Describing different types of intelligence tests, including the Flynn effect
   - Describing how intelligence may be influenced by differences in heredity and environment and by biases toward ethnic minority and socioeconomic groups

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):

Indicate the chapter(s)/unit(s), section(s), and/or pages reviewed:

Portions of the standard that are missing or not well developed in the instructional material (if any):

Rating: __________
2 - Meets Criterion for Standard 90%-100% (merit)
1 - Partially Meets Criterion for Standard 89%-70% (recommend with reservation)
0 - Does Not Meet Criterion for Standard 69%-0% (not recommended)

Each content standard or related content found in the bullets, indicate the grade level, the content standard, and the dominant strands. These strands are economics (E), geography (G), history (H), and civics and government (CG).

MAP ICONS are shaded outlines of the state of Alabama. Map icons are displayed after content standards, bullets, or examples to indicate content related to Alabama history or geography.
14. Explain the role of personality development in human behavior.
   - Differentiating among personality theories, including psychoanalytic, sociocognitive, trait, and humanistic theories of personality
   - Describing different measures of personality, including the Neuroticism-Extroversion-Openness Personality Inventory (NEO-PI), the Minnesota Multiphasic Personality Inventory (MMPI), and projective tests

Documentation of how the standard is met. Cite examples from the material (chapter and page numbers):
