Any child at a participating school may purchase a meal through the School Lunch and School Breakfast Program.

Children from families with incomes at or below 130 percent of the Federal poverty level are eligible for free meals. Those with incomes between 130 and 185 percent of the Federal poverty level are eligible for reduced-price meals. Schools may not charge more than 40 cents for reduced-price lunch and 30 cents for reduced-price breakfast.

Children from families with income over 185 percent of poverty pay a full price, though their meals are still subsidized to some extent. Local school food authorities set their own prices for full-price meals, but most operate their meal services as non-profit programs.

As the administering agency, the Department of Education reviews and monitors the School Lunch and Breakfast Program, and the Afterschool Snack Program within the state and brings about corrective action in instances where federal regulations are not being met.
What is the National School Lunch Program (NSLP)?

The National School Lunch Program (NSLP) is a federally assisted meal program operating in over 100,000 public and nonprofit private schools and residential child care institutions in the United States. In signing the 1946 National School Lunch Act, President Harry S. Truman said, “Nothing is more important in our national life than the welfare of our children, and proper nourishment comes first in attaining this welfare.”

In 2017, over 80,855,058 lunches were served in Alabama serving over 744,733 children.

How Does NSLP Work?
The Alabama State Department of Education administers the National School Lunch Program. The United States Department of Agriculture (USDA) provides funding for the program through cash subsidies and donated commodities. In return, school districts and independent schools that choose to take part must offer free or reduced price lunches to eligible children. Presently, 1,342 public schools, 21 private schools, and 80 residential care facilities participate in the NSLP in Alabama.

How Does NSLP Help Alabama?
In 2017, Alabama received $290,234,932 in cash payments. In addition to cash reimbursements, schools are entitled by law to receive commodity foods called “entitlement” foods. Schools can also get “bonus” commodities as they are available from surplus agricultural stocks. In 2017, Alabama received $27,712,134 through the USDA Foods program.

What is the School Breakfast Program (SBP)?

Some 14 million children in more than 89,000 schools and institutions in the U.S. start their day with the School Breakfast Program (SBP), a Federal entitlement program that provides states with cash assistance for non-profit breakfast.

In 2017, approximately 43,149,941 breakfast meals were served to over 482,122 children throughout Alabama.

Teachers have reported that their students are more alert and perform better in class if they eat breakfast. Studies support the link between nutrition and cognitive development of children. Tufts University released the 1998 statement following a Massachusetts research project: “Children who participated in the SBP were shown to have significantly higher standardized achievement test scores than eligible non-participants. Children receiving school breakfast also had significantly reduced absence and tardiness rates.”

The Fresh Fruit and Vegetable Program

Approximately 3.1 million dollars was awarded to one hundred and four (104) Alabama schools to participate in the USDA Fresh Fruit and Vegetable Program. This program makes fruit and vegetable snacks available at no cost to all children in participating schools. The program began in 2002 as a pilot program in a small number of schools. It has since become a permanent program that was expanded to cover selected schools in all 50 states, as a part of the 2008 Farm Bill.

What is the After School Snack Program?

On October 31, 1998, President Clinton signed the Child Nutrition Reauthorization Act of 1998. This Act expanded the USDA’s National School Lunch Program to provide cash reimbursements for snacks served to children and youth in certain after-school programs. This Act demonstrates USDA’s commitment to supporting after-school activities aimed at promoting the health and wellbeing of children and youth in our communities.

In 2017, 1,668,016 reimbursable snacks were served to children enrolled in Alabama afterschool tutorial programs.

The At-Risk After School Meals Program

The At-Risk After School Meals Program is a component of the Child and Adult Food Care Program (CACFP) that offers federal funding for a meal or snack to afterschool programs for children located in an eligible area. The program is designed for organizations that provide care and organized activities for children afterschool or on weekends, holidays, or school vacation during the regular school year only. Afterschool meals were served at 574 sites with 4,453,762 total meals served in the 2017-2018 school year.
