March 20, 2019

MEMORANDUM

TO: City and County Superintendents of Education

FROM: Eric G. Mackey
State Superintendent of Education

Effective Friday, March 22, 2019, to retain access to the Accountability Portal (P2A), select local education agencies' (LEA) educators should be assigned to the Plan 2020 Accountability App Viewer within the Education Directory. This will allow its users to continue having access to the portal based on the updated positions for the Education Identity Management (AIM) system.

Currently, the LEA users in the following positions have access to the P2A and the Accountability Information tile within the AIM system based on their roles in the Education Directory (EdDir): superintendents, accountability coordinators, A-F Report Card coordinators, school performance coordinators, and principals. The Information Systems’ section at the Alabama State Department of Education (ALSDE) will convert these users to the new Plan 2020 Accountability App Viewer. Going forward, if there are any additional personnel that the LEA identifies that need to use data from these sources, the LEA must assign the role of Plan 2020 Accountability App Viewer at the local level. As a reminder, the data within the P2A is student level data, and consideration should be given to each person being provided access to this data by your LEA. This is the accountability data that superintendents, select central office staff, and principals are able to preview prior to being released to the public.

For programmatic concerns, please contact Angela Martin, Accountability Coordinator, at (334) 694-4540, or by email at amartin@alsde.edu. For technical issues with AIM or EdDir, please contact the ALSDE Helpdesk at (334) 694-4777, or by email Helpdesk@alsde.edu.

Thank you for all you do for the students in Alabama schools.
