HAZARD ANALYSIS AND CRITICAL CONTROL POINT (HACCP)

- HACCP is a food safety plan that conforms to the principles and guidance issued by the U.S. Department of Agriculture.
- All SFAs must have a fully implemented HACCP plan.
- HACCP is a systematic approach to construct a food safety program designed to reduce the risk of foodborne hazards by focusing on each step of the food preparation process.
- SFA’s overall food safety program must include a written plan that tailors to its own specific program.
- All HACCP plans must include 3 main points: sanitation, temperature control, and Standard Operating Procedures (SOPs).
There are two types of hazards:

1. Ones specific to the preparation of the food, such as improper cooking for the specific type of food (beef, chicken, eggs, etc.)
2. Nonspecific ones that affect all foods, such as poor personal hygiene.

Specific hazards are controlled by identifying Critical Control Points (CCPs) and implement measures to control the occurrence or introduction of those hazards.

Nonspecific hazards are controlled by developing and implementing SOPs.
DEVELOPING A FOOD SAFETY PROGRAM

- HACCP
- Process Approach
- Standard Operating Procedures and Logs

https://fns-prod.azureedge.net/sites/default/files/Food_Safety_HACCPGuidance.pdf
HACCP STEPS

Hazard Analysis Critical Control Point

1. Conduct a hazard analysis
2. Determine critical control points (CCPs)
3. Establish critical limits
4. Establish monitoring systems
5. Identify corrective actions
6. Keep records
7. Review and verify your overall food safety program periodically.
FOOD SERVICE

Avoid offering any self-service food or drink options, such as hot and cold food bars, salad or condiment bars, and drink stations.

- Serve individually plated or pre-packaged meals, ensuring the safety of children with food allergies.
- As feasible, have children eat meals outdoors or in classrooms, while maintaining social distance.
- Teachers and students need to wash their hands with soap and water.
- Students should not share food from home or the cafeteria.
- If using cafeterias or communal dining halls, ensure that children remain at least 6 feet apart in food service lines and at tables while eating.
Clean and disinfect tables and chairs between each use.

Use disposable food service items (trays, utensils) when available.

If food is offered at any event, have pre-packaged boxes or bags for each attendee instead of a buffet or family-style meal.
STANDARD OPERATING PROCEDURES

Contents may include:

• Purpose
• Temperature control points
• Instructions
• Monitoring procedures
• Corrective actions
• Suggested record keeping documents
• Verification procedures
PURPOSE: To prevent foodborne illness by contaminated hands.

SCOPE: This procedure applies to anyone who handles, prepares, and serves food.

KEY WORDS: Handwashing, Cross Contamination

INSTRUCTIONS:
1. Train school nutrition employees on using the procedures in this SOP.
2. Follow state or local health department requirements.
3. Post handwashing signs or posters in a language understood by all school nutrition employees near all handwashing sinks, in food preparation areas, and restrooms.
4. Use designated handwashing sinks for handwashing only. Do not use food preparation, utility, and dishwashing sinks for handwashing.
5. Provide warm running water, soap, and a means to dry hands. Provide a waste container at each handwashing sink or near the door in restrooms.
6. Keep handwashing sinks accessible anytime employees are present.

7. Wash hands:
   - Before starting work
   - During food preparation
   - When moving from one food preparation area to another
   - Before putting on or changing gloves
   - After using the toilet
   - After sneezing, coughing, or using a handkerchief or tissue
   - After touching hair, face, or body
   - Eating, drinking, or chewing gum
   - After handling raw meats, poultry, or fish
   - After any clean up activity such as sweeping, mopping, or wiping counters
   - After touching dirty dishes, equipment, or utensils
   - After handling trash
   - After handling money
   - After any time the hands may become contaminated.
8. Follow proper handwashing procedures as indicated below:
   - Wet hands and forearms with warm, running water at least 100 °F and apply soap.
   - Scrub lathered hands and forearms, under fingernails, and between fingers for at least 10-15 seconds. Rinse thoroughly under warm running water for 5-10 seconds.
   - Dry hands and forearms thoroughly with single-use paper towels.
   - Dry hands using a warm air hand dryer.
   - Turn off water using paper towels.
   - Use paper towel to open door when exiting the restroom.

9. Follow FDA recommendations when using hand sanitizers. These recommendations are as follows:
   - Use hand antiseptics, also called hand sanitizers, only after hands have been properly washed and dried.
   - Use only hand sanitizers that comply with the FDA Food Code. Confirm with the manufacturers that the hand sanitizers used meet these requirements.
   - Use hand sanitizers in the manner specified by the manufacturer.
MONITORING:
1. A designated employee will visually observe the handwashing practices of the school nutrition employees during all hours of operation.
2. The designated employee will visually observe that handwashing sinks are properly supplied during all hours of operation.

CORRECTIVE ACTION:
1. Retrain any school nutrition employee found not following the procedures in this SOP.
2. Ask employees that are observed not washing their hands at the appropriate times or using the proper procedure to wash their hands immediately.
3. Retrain employee to ensure proper handwashing procedure.
VERIFICATION AND RECORD KEEPING:
The school nutrition manager will complete the Food Safety Checklist daily to indicate that monitoring is being conducted as specified. The Food Safety Checklist is to be kept on file for a minimum of 1 year.

Washing Hands, continued
(Sample SOP)

DATE IMPLEMENTED: ____________________  BY: ____________________

DATE REVIEWED: _____________________  BY: _____________________

DATE REVISED: ______________________  BY: ______________________
EMPLOYEE HEALTH AND GOOD PERSONAL HYGIENE PRACTICES

- Importance of good personal hygiene practices
- Symptoms and illnesses that must be reported to a supervisor
- How and when to properly wash hands
- Preventing bare hand contact with ready-to-eat foods.
IT ALL BEGINS WITH HYGIENE
PREVENTING FOODBORNE ILLNESS

REPORT:

- Diarrhea
- Vomiting
- Sore throat with fever
- Jaundice (yellowing of skin and eyes)
- Diagnosed foodborne illness
- Wounds on the hands or arms
- Exposure to foodborne illness
WASHING HANDS
PREVENTING BARE HAND CONTACT
TIME & TEMPERATURE ABUSE

- Occurs when:
  - Food sits at an unsafe temperatures for a long time.
  - Food is not cooked to a safe internal temperature.
- Harmful bacteria grow and reproduce rapidly with the temperature danger zone.

TEMPERATURE DANGER ZONE
41° F to 135° F
TEMPERATURES FOR FOOD SAFETY

- Temperature danger zone – why it is important to food safety.
- Time and temperature control for safety (TCS) foods
- Why use thermometers?
- How, when and why to calibrate a thermometer.
- Important food temperatures to monitor throughout the foodservice process.
THERMOMETERS
THERMOMETER CALIBRATION

Ice-Water Method

- **Ice Water** (32°F, 0°C)
- 2 in. (5 cm) Minimum

Boiling-Water Method

- **Boiling Water** (212°F, 100°C)
- 2 in. (5 cm) Minimum
HOLDING AND SERVING

Keep HOT FOODS at 135 °F or above.

Keep COLD FOODS at 41 °F or below.
REHEATING

165 °F for 15 seconds, within 2 hours
AVOIDING CONTAMINATION OF FOOD

- Three types of food contamination
- Methods for preventing food contamination
- How proper cleaning, rinsing, and sanitizing can prevent food contamination.
FOOD-TO-FOOD CROSS CONTAMINATION

Method

Prevention
EQUIPMENT or CONTACT SURFACE-TO-FOOD CROSS CONTAMINATION

**Using Logs**

**Hot and Cold Holding Temperature Log**

**Instructions:** A designated school nutrition employee will record the food item, date, time, temperature, corrective action, and initials on this log. The school nutrition manager will verify that school nutrition employees have taken the required temperatures by visually monitoring food employees during the shift and reviewing, initialing, and dating this log daily. Maintain this log for a minimum of 1 year.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, disability, age, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA.

Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, (AD-3027) found online at: How to File a Complaint, and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture
    Office of the Assistant Secretary for Civil Rights
    1400 Independence Avenue, SW
    Washington, D.C. 20250-9410;
(2) fax: (202) 690-7442; or
(3) email: program.intake@usda.gov.

This institution is an equal opportunity provider.
