

Meal Provisions (CEP, Provision One, Two and Three) Webinar Questions & Answers

Answers are in red:

1. Can you send specific directions on what is to be kept on file for an admin review for CEP districts? I am confused because the state pulls our data from what I understand so I am not sure what else is needed for the review.
 - A list of Direct Certification students as of April 1.
 - A list provided from ALSDE and POS software to demonstrate consistency.
2. With Prov. 2, does the local LEA have to cover the cost only if the CNP account goes negative, or does it have to cover the percentage of paid students no matter the balance in the CNP account?
 - The school must be prepared to pay the difference between Federal reimbursement and the cost of providing all meals at no charge from sources other than Federal funds. When the overall nonprofit school food service account (CNP account) activity is insufficient to cover Program costs, the school food authority of a school participating in Provision 2 must pay the difference from non-Federal sources. This applies to CEP schools as well.
