Required Narratives

How does the LEA plan to use funds to implement prevention and mitigation strategies in order to continuously and safely operate schools for in-person learning?

* Hoover City Schools has instituted a universal masking mandate for the first theory (30) days of school. Facial coverings will be provided to students in need of a mask. Parents and families are encouraged to examine the health of their students daily to include temperature checks. Hand sanitizer will be provided throughout the school including classrooms and common areas. Parents can request and will be provided a partition for their child's desk or table if they so choose. Students and drivers are required to wear facial coverings on the public school buses where masks and hand sanitizer will be available to drivers and riders. In the school cafeterias, a la carte items such as salads and fruits will continue to be individually wrapped. Hand sanitizer will be available here as well and children are encouraged to socially distance while eating their meal(s). Following the report of a positive person in a school, personnel will carry out disinfecting protocols in all involved areas. Water fountains will be closed off but the water filling stations will still be accessible. Enhanced ventilation measures are installed to accommodate high efficiency filters and minimize harmful particles in the air. High efficiency filters will be routinely changed at each facility. Students will be screened before participating in field trips or school travel.

How will the LEA ensure that the evidence-based interventions will address the academic impact of lost instructional time and ensure that those interventions respond to the academic, social, emotional, and mental health needs of all students including underrepresented student subgroups (each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care) and those who are particularly impacted disproportionately by the COVID-19 pandemic?

* Hoover City Schools will use multiple data sources to identify students that have been impacted by the COVID-19 global pandemic. These sources will include but are not limited to standardized test results, diagnostic results, formative assessments, review of absenteeism based on illness or quarantine, those students who chose virtual schooling in the last 18 months, socio-economic status, and warning signs and symptoms of increased anxiety, helplessness or other social emotional needs. Based on the data gathered, Hoover City Schools will allocate the evidence based resources to students that are determined to be most negatively impacted. A plan will be developed to assist individual students based on their area of need along with frequent assessment of progress to determine the efficacy of interventions. Students identified as disproportionately impacted by the COVID-19 pandemic will be prioritized based on the aforementioned data points.

How will the LEA comply with the requirements of section 427 of GEPA (20 U.S.C. 1228a)?

The description must include information on the steps the LEA proposes to take to permit students, teachers, and other program beneficiaries to overcome barriers (including barriers based on gender, race, color, national origin, disability, and age) that impede equal access to, or participation in, the ESSER III program.

* Hoover City Schools is dedicated to eliminating barriers based on gender, race, color, national origin, disability and age that prohibits equal access to educational and extracurricular offerings. The district's strategic plan outlines goals, objectives, resources and outcomes to ensure comparable access to programs and activities. Additionally, supplemental funding is utilized to eliminate financial barriers for at-risk stakeholders. Annual needs assessments are used to identify areas where additional support is needed. Building and district administrators collaborate throughout the school year to ensure

participation and program offerings are accessible to all students, and that pertinent professional development is provided to all teachers. Hoover City schools will ensure equal access to, or participation in resources, projects, or activities afforded to the district from federal funds by:

- Assessing and gathering information on all students including those that are virtual.
- Prioritizing our most vulnerable and marginalized student populations.
- Providing transportation and meals when possible to eliminate barriers to participation.
- Creating student specific plans to target needs.
- Providing access to activities with no financial obligation on the part of the students or families.
- Providing compensation to certified teachers.

How will the LEA actively monitor their allocations, conduct interim audits to ensure an appropriate application of funds, collect and manage data elements required to be reported, and report this information to the community?

* Hoover City Schools will monitor allocations by reviewing the funding expenditures monthly with the Chief School Financial Officer, the Director of Federal Programs and the Department of Curriculum and Instruction. Data will be collected by the personnel implementing the activities or projects and reported back to the review committee. The budget for the federal funding received thus far was shared with our community at a work session hosted by the Board of Education. Hoover City Schools will continue to periodically update the community at our monthly Board of Education Meetings.

How will the LEA meaningfully engage with families and communities throughout the life of the ARP ESSER and other relief funds?

* Hoover City Schools asked our school community to evaluate their experiences after a year living with the COVID-19 pandemic, and suggest projects and activities that would address some of the educational and social-emotional needs caused by COVID-19. These suggestions were reviewed by a small committee and relief funds were allocated to select projects. Funds were budgeted to support the Bridges program. The Bridges program supports our families through counseling. The intervention counselors are working with students and families that are affected by substance abuse due to the increased prevalence caused by the COVID-19 pandemic.

As funds continue to be budgeted, stakeholders are consulted and encouraged to offer guidance.

The highest valued learning recovery strategy was the hiring of additional teachers to work with students during the next two school years to identify learning gaps, provide face-to-face instruction to individuals and small groups, and support academic interventions for an increased number of students in need. Additional time for instruction is important, and our after-school and summer programs will support that need, but we believe our best opportunity to help students recover lost learning is to use more teachers in the areas of mathematics and reading to make better use of our time in the regular school day.

ARP ESSER State Reserve Allocation to Address Loss of Instructional Time

The ALSDE is providing a State Reserve allocation to LEAs to address the loss of instructional time through the implementation of evidence-based interventions and ensure that those interventions respond to students’ social, emotional, and academic needs and address the disproportionate impact of COVID-19 on underrepresented student subgroups.

For the ARP ESSER State Reserve Allocation, the following interventions are allowable:

1. Summer Learning & Summer Enrichment Programs
2. Comprehensive After-School Programs
3. Other – See Intervention box C for more details.

Required Narratives

Provide a description of the evidence-based program(s) (including partnerships with community-based organizations) the LEA has selected to use with the ARP ESSER State Reserve, and how the LEA will address the disproportionate impact of COVID-19 on certain groups of students, including each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care.

* Funds will be used to support summer intervention learning and enrichment programs. The summer intervention programs will focus on K-3 Literacy, 6-8 Summer School, and 9-12 Credit Recovery programs. Funds will be used to pay employees, purchase curriculum, and provide bus transportation, and purchase consumable supplies. Further enrichment options will be made available for elementary and middle students in the summer of 2023 to help make up for the loss of field trips and hands-on activities during the time of COVID-19 learning restrictions. Opportunities will be available for all stakeholders including children from low-income families, children with disabilities, English Language Learners, migrant, students experiencing homelessness, children in foster care. These offerings will not be limited to a particular race or gender.

Indicate the data sources the LEA used to identify the students most in need of the program(s) and the extent to which the LEA will evaluate the impact of the program(s).

* Hoover City Schools will conduct an analysis of formative and summative data as well as attendance data to identify students most in need of these programs. This data will be triangulated to reveal students most in need of support to improve academic achievement.

Using the allocation from the ARP ESSER State Reserve, explain how the LEA will identify and engage

- 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and
- 2) students who did not consistently participate in remote instruction when offered during school building closures.

* After evaluating data indicating specifics about our students’ learning losses and our teachers’ prioritization of recovery strategies, the highest valued learning recovery strategy was the hiring of additional teachers to work with students during the next two school years to identify learning gaps, provide face-to-face instruction to individuals and small groups, and support academic interventions for an increased number of students in need. Interventionists will use small group instruction utilizing evidence based materials to provide academic support. The programs will include a variety of content support and enrichment opportunities to keep the learners engaged and decrease the likelihood of frequent absenteeism. During this time, the home/school connection will be strengthened by parent and family engagement embedded activities to support instruction.

After evaluating data indicating specifics about our students' learning losses and our teachers' prioritization of recovery strategies, the highest valued learning recovery strategy was the hiring of additional teachers to work with students during the next two school years to identify learning gaps, provide face-to-face instruction to individuals and small groups, and support academic interventions for an increased number of students in need. These teachers will provide instruction in addition to, not in replacement of, core grade level instruction in mathematics and reading. The teachers will work with students in individual and small group settings using a combination of push-in and pull-out strategies as deemed most appropriate for different groups of students.
