Required Narratives

How does the LEA plan to use funds to implement prevention and mitigation strategies in order to continuously and safely operate schools for in-person learning?

* Lanett City Schools remains committed to providing high-quality instruction, academic and emotional supports and interventions, mental health supports, and a safe learning environment for all students and staff. To support the safe return to in-person instruction and sustain safe operation, we have developed and implemented a Plan for In-Person Instruction. The plan provides detailed procedures and district sanctioned practices for students, staff, parents, and other stakeholders. We have also updated our Pandemic Preparedness Response Plan to include specific COVID-19 prevention and mitigation strategies. We will encourage vaccinations for eligible students, encourage consistent and correct mask use, practice physical distancing (social distancing), educate students and staff on the symptoms of COVID-19 and encourage testing to those that experience symptoms, implement additional measures to increase ventilation/air quality in our facilities, practice hand washing and respiratory etiquette, and encourage students and staff to stay home when sick. Lanett City Schools will continue to work with local medical professionals and public health officials and ensure that our guidelines remain consistent with applicable laws and regulations and best practices as advised by the medical and public health community.

How will the LEA ensure that the evidence-based interventions will address the academic impact of lost instructional time and ensure that those interventions respond to the academic, social, emotional, and mental health needs of all students including underrepresented student subgroups (each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care) and those who are particularly impacted disproportionately by the COVID-19 pandemic?

* Lanett City Schools conducted an initial districtwide evaluation to determine educational needs that developed as a result of the COVID-19 pandemic, and our evaluation efforts will be ongoing throughout the ESSER III funding cycle. We will continue to utilize both online and face-to-face screeners and assessments to determine learning and achievement gaps, as well as facilitate programs that will address categorized and prioritized needs. All schools will continue to have access to online tiered intervention programs to help assess and pinpoint learning gaps and provide reading and math intervention. There is a strong emphasis on growth, closing gaps, and moving all students as far as possible toward proficiency. This is achieved through qualified personnel implementing strategic, standards-based instruction, ongoing assessment, targeted intervention, and data analysis. Social, emotional, and mental health needs are continuously assessed and addressed through collaboration among school staff, parents, and community partners (e.g., School-Based Mental Health). Students who may be the most vulnerable to academic or functional regression, such as students with disabilities or English Language learners, will receive additional consideration for specialized services or materials specific to their unique needs.

How will the LEA comply with the requirements of section 427 of GEPA (20 U.S.C. 1228a)?

The description must include information on the steps the LEA proposes to take to permit students, teachers, and other program beneficiaries to overcome barriers (including barriers based on gender, race, color, national origin, disability, and age) that impede equal access to, or participation in, the ESSER III program.

* In terms of distribution, general materials and services purchased with ESSER III funds will be made available to all students and staff equitably, without regard to factors such as gender, race, color, national origin, disability, and age that may impede equal access to, or participation in, the ESSER III program. Students who may be the most vulnerable to academic or functional regression, such as students with disabilities or English Language learners, will receive additional consideration for specialized services or materials specific to their unique needs. To the extent practicable, information will be provided to parents in a language that they understand.

How will the LEA actively monitor their allocations, conduct interim audits to ensure an appropriate application of funds, collect

and manage data elements required to be reported, and report this information to the community?

* Generally accepted accounting standards will be employed for handling all allocations. The funds will be reconciled monthly through the accounting software and use of reporting tools to manage expenses and ensure funds are spent according to the budget. Funds will be requested only for current expenses. Financial reports will be posted monthly on the website so everyone is well informed of funds expended to date.

How will the LEA meaningfully engage with families and communities throughout the life of the ARP ESSER and other relief funds?

* Lanett City Schools will provide information regarding the use of ARP ESSER and other relief funds to families, community members, and other stakeholders in a variety of ways over the life of the funding. For example, information may be presented at school board meetings, through social media posts, or on the district and school websites. The district will continue its usual practice of soliciting parent and stakeholder input through avenues such as surveys. The district will purchase resources for at-home use and parent education as an additional means of engaging parents in COVID-19 recovery efforts.

ARP ESSER funds will be used to purchase PowerSchool Performance Matters, an extension of the SIS. Performance Matters is an interactive hub for tracking all assessments used in the district, and it will also serve as a tool for creating common assessments aligned to district pacing guides. The common assessments will be utilized to assess and monitor student progress toward mastery of state standards and student preparation for state standardized assessments. Teachers will be better able to design and adjust instruction according to student needs, including targeted instruction to help remediate learning loss and related gaps. The assessments are all digital, which will allow us the ability to continue ongoing assessment and progress monitoring even if a school or the district has to transition to remote learning due to a high number of positive COVID-19 cases. We will be able to collect and analyze current data on students to be able to effectively plan and facilitate targeted instruction, whether in-person or remote. During the extended period of remote learning during the 2020-2021 school year, Lanett City was unable to collect the same type and quantity of student data that we would during a typical school year. We feel very strongly that we cannot afford to risk a second year with missing data, should we have to return to remote learning (due to COVID-19 cases). (All funds will be expended prior to September 30, 2024.)

Funds will also be used to facilitate systems for communicating with parents and to create opportunities to enhance families' ability to support student learning. ARP ESSER funds will also be used to purchase the PowerSchool Online Registration system. This will allow parents to update their contact information and student information in a convenient and remote manner, regardless of whether we are engaging in face-to-face or remote learning (due to high numbers of positive COVID-19 cases). Services will conclude and/or funds will be expended prior to September 30, 2024.

ARP ESSER State Reserve Allocation to Address Loss of Instructional Time

The ALSDE is providing a State Reserve allocation to LEAs to address the loss of instructional time through the implementation of evidence-based interventions and ensure that those interventions respond to students' social, emotional, and academic needs and address the disproportionate impact of COVID-19 on underrepresented student subgroups.

For the ARP ESSER State Reserve Allocation, the following interventions are allowable:

1. Summer Learning & Summer Enrichment Programs
2. Comprehensive After-School Programs
3. Other – See Intervention box C for more details.

Required Narratives

Provide a description of the evidence-based program(s) (including partnerships with community-based organizations) the LEA has selected to use with the ARP ESSER State Reserve, and how the LEA will address the disproportionate impact of COVID-19 on certain groups of students, including each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care.

* Lanett City Schools will utilize ARP ESSER State Reserve funds to address lost instructional time in several ways. State-approved reading and math assessments, along with other assessment tools utilized by the district, will be used to identify students most in need of support.

Summer learning and enrichment programs will be offered at both the elementary and secondary levels. Summer opportunities will focus primarily on new skill acquisition, remediation of gaps, and practice to support skill retention. Summer program staff will implement a variety of evidence-based strategies and practices including, but not limited to, the following: small group instruction; ongoing assessment and progress monitoring; explicit instruction in reading fluency, comprehension, and vocabulary; hands-on learning; and targeted instruction based on students' assessed needs. Summer learning will also incorporate enrichment activities to enhance students' overall well-being, and SEL content may be included on an as-needed basis.

After-school programming will be provided at LCS campuses through programs such as the Zero Period for middle school, after-school program at the elementary school, and individualized tutoring at the high school. Staff will use evidence-based strategies such as explicit skills instruction, small group instruction, hands-on learning, and targeted instruction based on identified needs.

Lanett City has a high percentage of children from low-income families, and each school in the district serves students through a Title I Schoolwide program. For FY22, the district's low-income percentage (with multiplier) is 92%. Students with disabilities represent at least 10% of our student population, and at least 10% is made up of English Learners. Lanett City students represent almost all the major racial and ethnic groups, and gender is basically equally distributed. Due to this diverse makeup of our student population, Lanett City will be able to use ESSER State Reserve funds to address COVID-19 impacts on a variety of groups, including special populations.

Indicate the data sources the LEA used to identify the students most in need of the program(s) and the extent to which the LEA will evaluate the impact of the program(s).

* Lanett City Schools conducted an initial districtwide evaluation to determine educational needs that developed as a result of the COVID-19 pandemic, and our evaluation efforts will be ongoing throughout the ESSER III funding cycle. We will continue to utilize both online and face-to-face screeners and assessments to determine learning and achievement gaps, as well as facilitate programs that will address categorized and prioritized needs. All schools will continue to have access to online tiered intervention programs to help assess and pinpoint learning gaps and provide reading and math intervention. Administrator and staff documentation (e.g., logs of attempted contacts) was completed throughout the 2020-2021 school year and will serve as a primary source of information. Additional data sources may include, but are not limited to, the following: lists of students who were fully virtual for the entire 2020-2021 school year, attendance reports, report cards, retention reports, and other student tracking analytics related to program usage and assignment completion.

Using the allocation from the ARP ESSER State Reserve, explain how the LEA will identify and engage

- 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and
- 2) students who did not consistently participate in remote instruction when offered during school building closures.

* During the initial COVID-19 school closure in the spring of 2020, Lanett City was not in a position to offer remote learning.

Packets of work were distributed to and collected from students district-wide in an effort to cover as much as possible of the content remaining for the year, but every student in the district missed in-person instruction from mid-March to late May 2020. The district was able to gather enough devices to engage in remote learning for all students for the beginning of the 2020-2021 school year. (The only exception was for ELs and students with IEPs, who had the option to come for on-campus services in small groups in addition to remote instruction.) Lanett City was not able to resume full-time in-person learning until February 2021. Students whose parents chose the virtual option completed all work via ACCESS and/or SchoolsPLP without the benefit of in-person instruction (with the exception of ELs and students with IEPs). The large majority of LCS students resumed traditional learning as soon as it was possible, with very few remaining virtual. Especially during the period of fully remote learning, though, district staff noted a significant number of students who were either only minimally engaged or basically disengaged from the learning process. Staff made continual efforts to contact and connect with those students.

ARP ESSER State Reserve funds will be used to address learning loss in any students as needed, but particular efforts will be made to identify and engage those students who missed the most in-person instruction during 2020 and 2021. Administrator and staff documentation (e.g., logs of attempted contacts) will serve as a primary source of information. Additional data sources may include, but are not limited to, the following: lists of students who were fully virtual for the entire 2020-2021 school year, attendance reports, report cards, retention reports, and other student tracking analytics related to program usage and assignment completion.
