Required Narratives

How does the LEA plan to use funds to implement prevention and mitigation strategies in order to continuously and safely operate schools for in-person learning?

* Oneonta City Schools is increasing efforts to maintain a high level of cleanliness by increasing our custodial staff by two additional 197 day custodians and ensuring they have proper sanitizing supplies. In the event the positivity rate reaches a level of heightened concern, we will contract with a cleaning service to conduct a thorough disinfecting of our facilities. Additionally, to prevent the spread of viruses, bathroom fixtures will be converted to touchless water faucets, soap dispensers, and paper towel dispensers. Student access to our water fountains has been restricted and students are encouraged to bring their own water bottles. We plan to install additional water bottle filling stations in student areas. If we determine indoor air quality as an issue, then appropriate steps will be taken to make improvements. We have also adjusted how our students enter into the school in an effort to reduce students gathering in large common areas. The intermixing of student groups throughout the day has been reduced whenever feasible.

How will the LEA ensure that the evidence-based interventions will address the academic impact of lost instructional time and ensure that those interventions respond to the academic, social, emotional, and mental health needs of all students including underrepresented student subgroups (each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care) and those who are particularly impacted disproportionately by the COVID-19 pandemic?

* To ensure that our interventions appropriately serve all student subgroups, we will conduct annual evaluations of the impact of our funding and our intervention plans. Students will participate in formative assessments and the data from those along with valuable input from teachers will drive the intervention supports delivered to our students. Extra support will be provided to any student with additional needs. As more formative data is gathered, interventions will be continually evaluated for effectiveness and appropriateness, and then adjusted to help the student reach optimal gains.

How will the LEA comply with the requirements of section 427 of GEPA (20 U.S.C. 1228a)?

The description must include information on the steps the LEA proposes to take to permit students, teachers, and other program beneficiaries to overcome barriers (including barriers based on gender, race, color, national origin, disability, and age) that impede equal access to, or participation in, the ESSER III program.

* Oneonta City Schools assures that students, teachers or other beneficiaries, regardless of gender, race, color, national origin, disability, or age, will have equal access to programs supported within the ESSER III program.

How will the LEA actively monitor their allocations, conduct interim audits to ensure an appropriate application of funds, collect and manage data elements required to be reported, and report this information to the community?

* Our LEA will determine measures regarding each activity supported within our ESSER III programming. These measures will be annually reviewed to determine the effectiveness of each activity and will be reviewed by our District Leadership team and will be reported to annually to our Federal Programs Advisory Committee.

How will the LEA meaningfully engage with families and communities throughout the life of the ARP ESSER and other relief funds?

* In an effort to engage parents in a meaningful way, multiple approaches will be used. To give everyone an opportunity for input, annual surveys will be made available to help identify stakeholder priorities. To further develop the prioritized areas,

stakeholder teams such as Federal Programs Advisory Committee and District Leadership Team, will review the survey results and analysis as ongoing planning and evaluating of our ESSER III program occurs.

ARP ESSER State Reserve Allocation to Address Loss of Instructional Time

The ALSDE is providing a State Reserve allocation to LEAs to address the loss of instructional time through the implementation of evidence-based interventions and ensure that those interventions respond to students' social, emotional, and academic needs and address the disproportionate impact of COVID-19 on underrepresented student subgroups.

For the ARP ESSER State Reserve Allocation, the following interventions are allowable:

1. Summer Learning & Summer Enrichment Programs
2. Comprehensive After-School Programs
3. Other – See Intervention box C for more details.

Required Narratives

Provide a description of the evidence-based program(s) (including partnerships with community-based organizations) the LEA has selected to use with the ARP ESSER State Reserve, and how the LEA will address the disproportionate impact of COVID-19 on certain groups of students, including each major racial and ethnic group, children from low-income families, children with disabilities, English Learners, gender, migrant students, students experiencing homelessness, and children and youth in foster care.

* Oneonta City Schools will provide after-school and summer services to students in grades K-12 to support lost instructional time for students. OCS utilizes additional staff to support student academic improvement as its evidence based strategy. OCS provides after-school and summer learning opportunities for students utilizing ARP - State reserve funds to allow a greater equity in access for students of various ethnicities, socioeconomic levels, students experiencing homelessness, and students in foster care. OCS will provide technology for increased student academic support to include software to support learning such as iREADY and provide computer hardware, such as Chromebooks and desktop computers. Oneonta Elementary School will host summer camps to serve students identified through formative and summative assessments, grades, PST academic, behavioral, and social/emotional data. Students in subgroups, such as students with disabilities, English Learners, etc. will also be prioritized to attend the summer learning camps. Students will receive instruction in Literacy and Math that targets their identified needs and will also be provided activities to keep them engaged and motivated to attend. Students will be taught by highly qualified teachers in small-group settings. Evidence-based programs used to close the gap in summer camps include iReady intervention, LETRS strategies, and Heggerty phonics lessons. In addition, student book subscriptions will allow students to have books at home, which will benefit low socio-economic groups and will also provide reading opportunities that have been limited by closures due to COVID. Other family resources for special populations will include mental health professionals, especially for low-income or otherwise challenged families and services for ELL students and their families.

Indicate the data sources the LEA used to identify the students most in need of the program(s) and the extent to which the LEA will evaluate the impact of the program(s).

* Data from iReady fall, winter, and spring formative assessments, ACAP, ACT, in course grades, attendance, and PST will be used to identify students most in need of our summer learning camps. Additionally, students who have shown consistent literacy weaknesses will be encouraged to attend summer camp. OCS will consider comparative iReady data from the summer months, but will also monitor these students for growth throughout the following school year with formative iReady assessments, classroom performance, and ACAP summative assessment scores of students who attend summer camp. As part of the district data evaluation process, the school district will use longitudinal data to determine the impacts of after-school and summer programs and make any needed programmatic changes based on results.

Using the allocation from the ARP ESSER State Reserve, explain how the LEA will identify and engage

- 1) students who have missed the most in-person instruction during the 2019-2020 and 2020-2021 school years; and
- 2) students who did not consistently participate in remote instruction when offered during school building closures.

* Oneonta City Schools will use student data to determine which students receive services through our after-school and summer school programs. Priority will be given to students who have documented gaps in instruction, based on attendance and academic data. Attendance data will be used to evaluate students who participated in in-person instruction as well as those students who participated in virtual education in the previous academic year. Academic data will include attendance, summative assessment data, and formative assessment data from benchmark assessments, ALSDE assessments, and in-class anecdotal data gathered by teachers. Student participation in afterschool and summer programming is a continuous evaluation process to ensure students who are lacking instructional support receive services in a timely and effective manner, based on student need.
