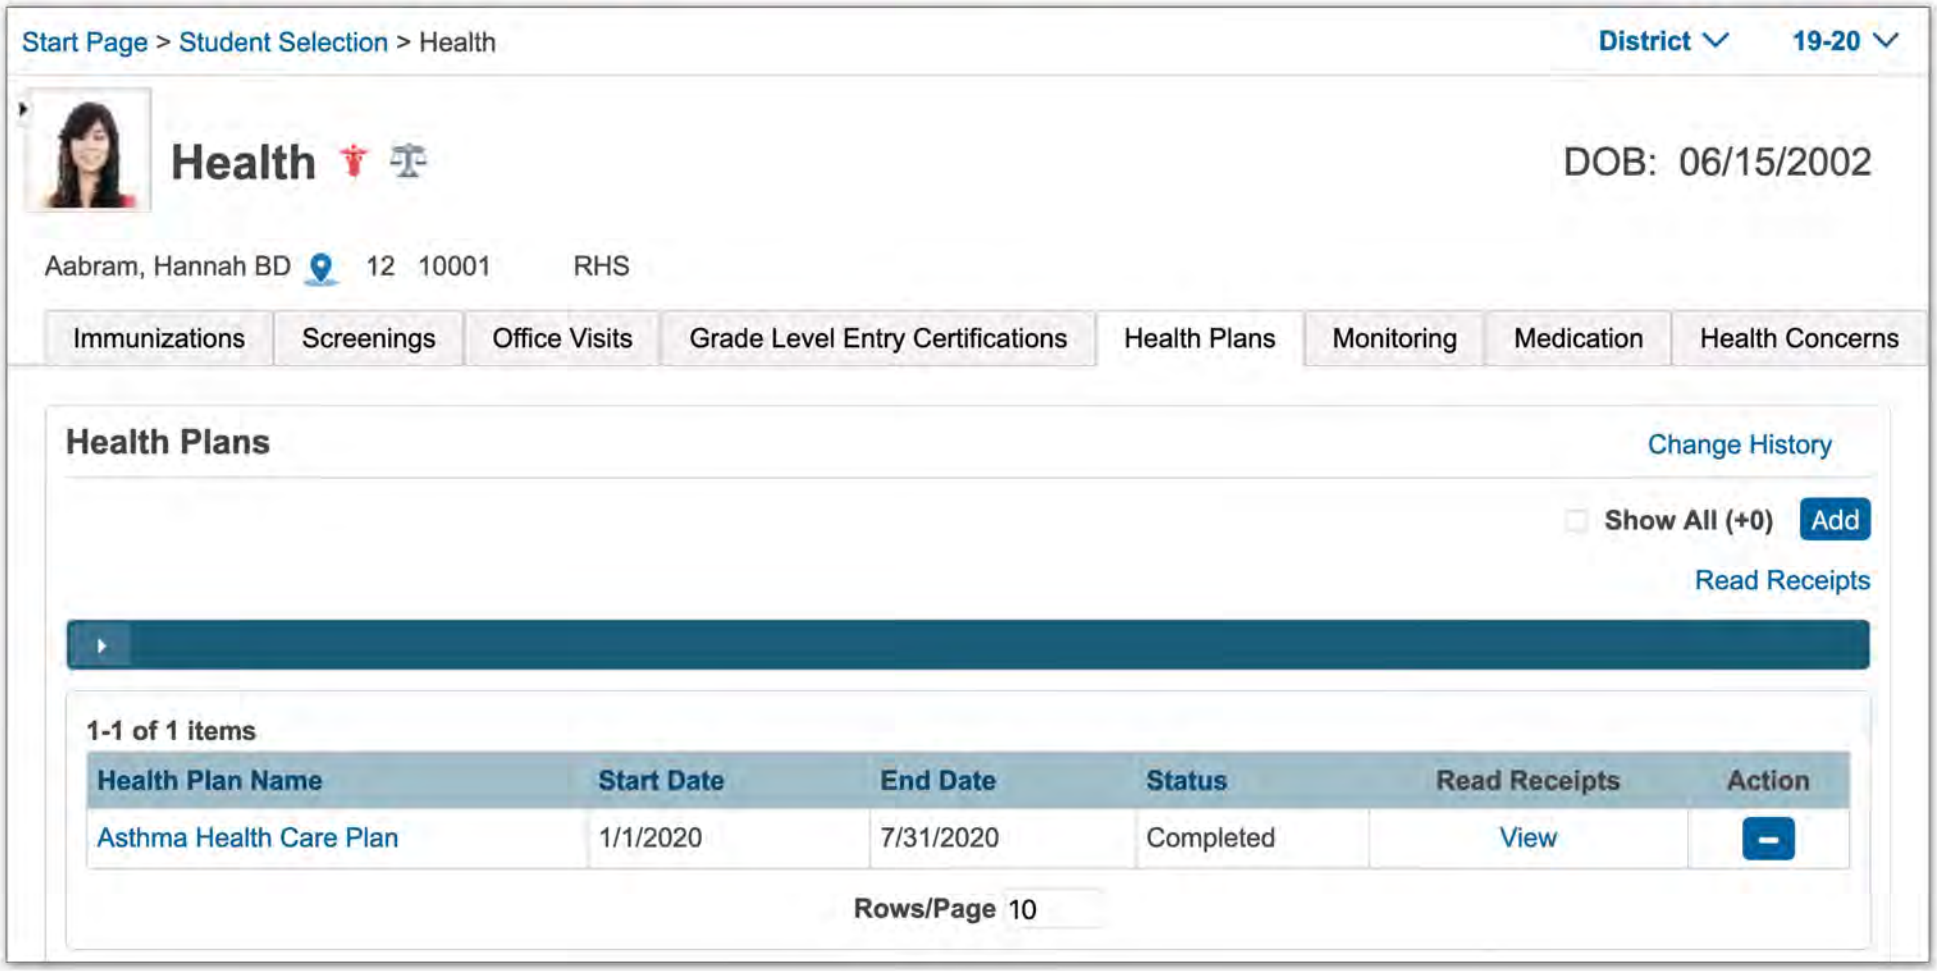
Health Plans

Health Plans

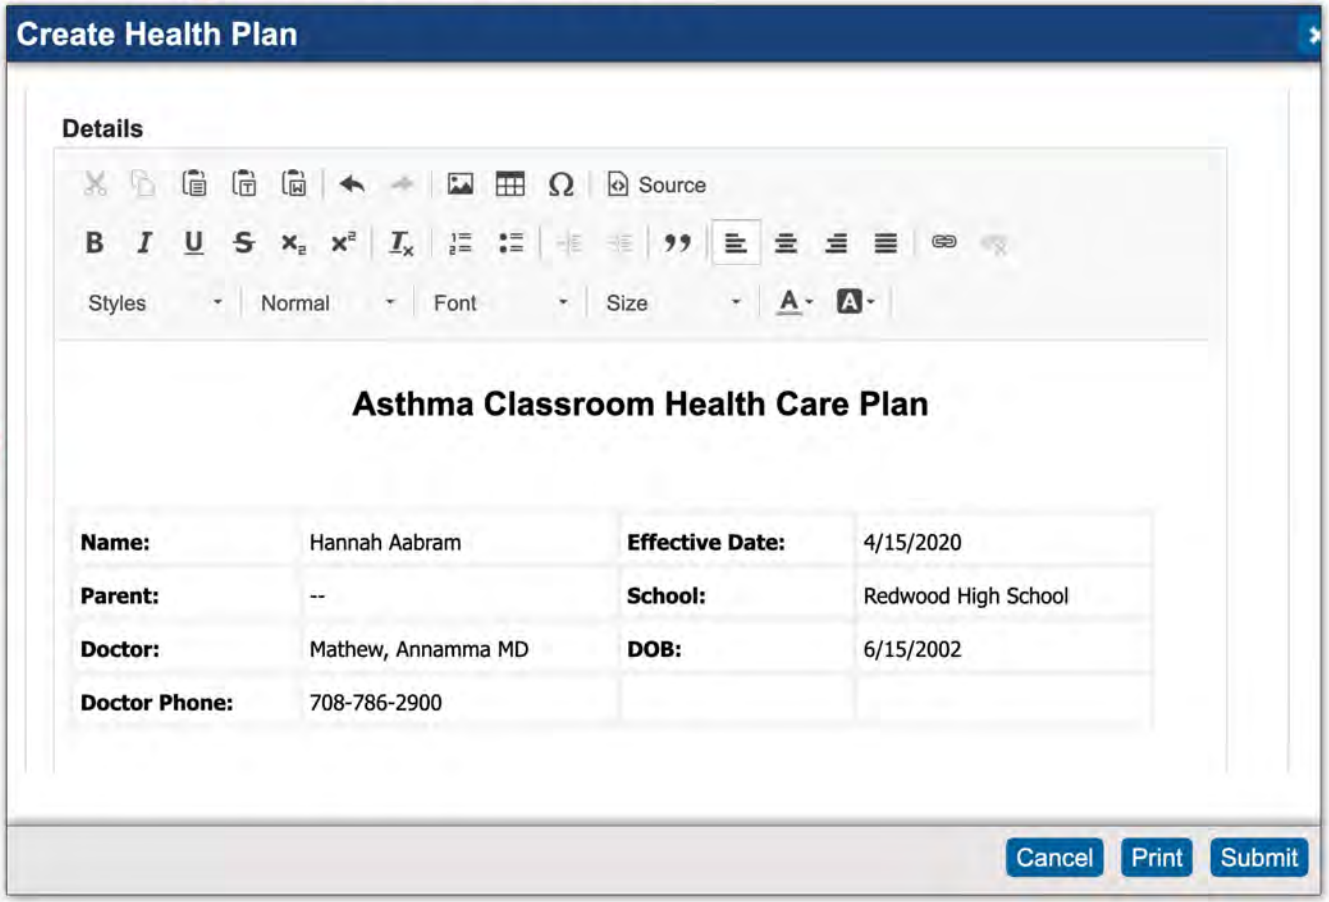
- Health Plans enable staff to track the medical conditions for students
- A health plan can help to ensure school staff who interact with the student
  - are aware of the student's condition, and have the latest details regarding the student's condition
  - know how to recognize warning signs
  - know how to react if a critical condition arise
- Health Plans can be printed and provided to staff not in PowerSchool
- The medical alert will activate for a student with an active health plan

The Health Plans Tab



Health Plans

- Health Plans are entered using a Rich Text Editor
- Can be printed right from the page
- Plans can be draft, competed/active, or ended
- **Health Plan Templates** provide consistent forms for a condition and speed up plan creation



PowerSchool

Complete and Save

Asthma is a chronic lung disease, which is characterized by attacks of breathing difficulty. It is caused by spasms of the muscles in the walls of the air passages to the lungs. It is not contagious and tends to run in families. Asthma can be aggravated by allergy to pollen or dust, viral illness, cold, emotions, or exercise. There is no cure but asthma can be controlled with proper diagnosis and management.

Treatment consists of avoiding known triggers, recognizing early symptoms, monitoring with a peak flow meter, and medication to reduce or prevent symptoms. Some children who are allergic to specific substances may benefit from desensitization shots.

Problem: Breathing difficulty

Goal: Avoid attacks and maintain airway.

Action:

1. (____) known triggers include:_____ and {{First Name}} should avoid these triggers.

    1. Symptoms of an asthma attack include:

Coughing	Tightness in chest
Wheezing	Gasping for air
Prolonged expiration	Color changes (pale or blue)

2. If symptoms of an attack are present or {{First Name}} states that {{he/she}} feels an attack coming on:

1. Have him/her sit up right.

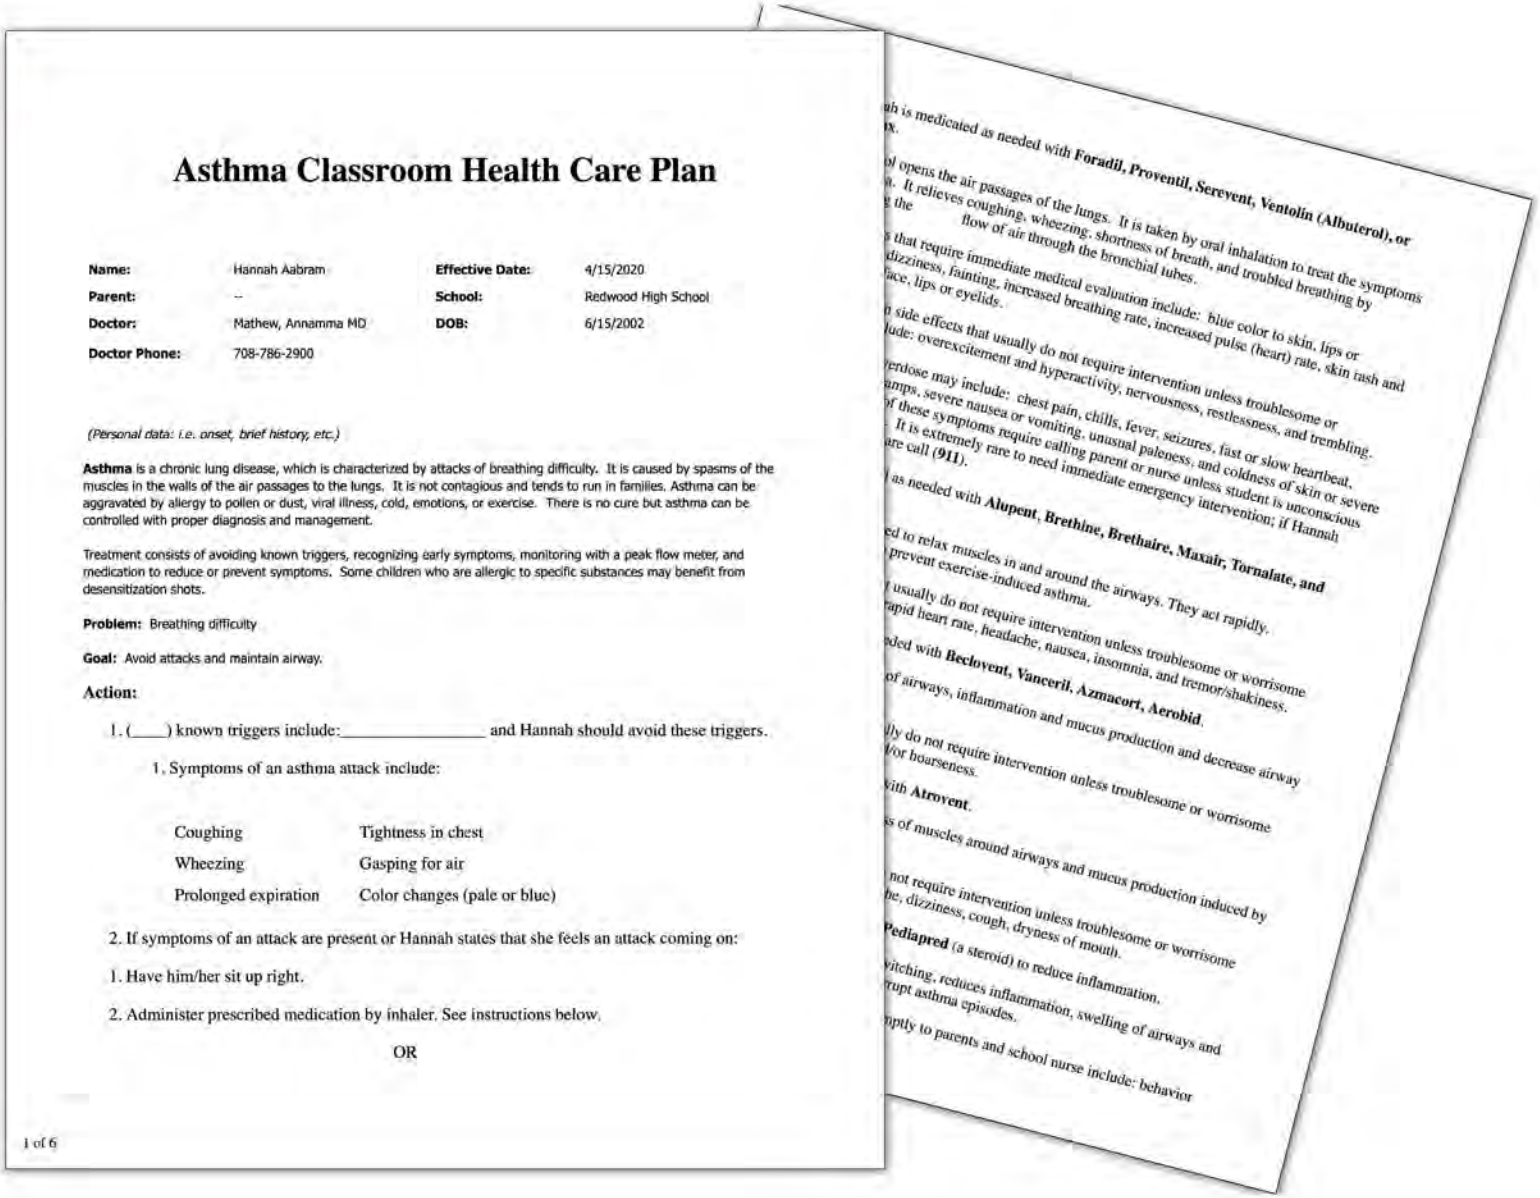
2. Administer prescribed medication by inhaler. See instructions below.

OR

1. Administer medication by nebulizer as prescribed. See instructions below.

2. Reassure {{First Name}} and attempt to keep him/her calm and breathing slowly and deeply

or Print



Asthma Classroom Health Care Plan

Name:	Hannah Aabram	**Effective Date:**	4/15/2020
Parent:	--	**School:**	Redwood High School
Doctor:	Mathew, Annamma MD	**DOB:**	6/15/2002
Doctor Phone:	708-786-2900		

(Personal data: i.e. onset, brief history, etc.)

Asthma is a chronic lung disease, which is characterized by attacks of breathing difficulty. It is caused by spasms of the muscles in the walls of the air passages to the lungs. It is not contagious and tends to run in families. Asthma can be aggravated by allergy to pollen or dust, viral illness, cold, emotions, or exercise. There is no cure but asthma can be controlled with proper diagnosis and management.

Treatment consists of avoiding known triggers, recognizing early symptoms, monitoring with a peak flow meter, and medication to reduce or prevent symptoms. Some children who are allergic to specific substances may benefit from desensitization shots.

Problem: Breathing difficulty

Goal: Avoid attacks and maintain airway.

Action:

1. (____) known triggers include:_____ and Hannah should avoid these triggers.

1. Symptoms of an asthma attack include:

Coughing	Tightness in chest
Wheezing	Gasping for air
Prolonged expiration	Color changes (pale or blue)

2. If symptoms of an attack are present or Hannah states that she feels an attack coming on:

1. Have him/her sit up right.

2. Administer prescribed medication by inhaler. See instructions below.

OR

...ah is medicated as needed with **Foradil, Proventil, Serevent, Ventolin (Albuterol), or** ...ex.

...ol opens the air passages of the lungs. It is taken by oral inhalation to treat the symptoms ...n. It relieves coughing, wheezing, shortness of breath, and troubled breathing by ...g the flow of air through the bronchial tubes.

...s that require immediate medical evaluation include: blue color to skin, lips or ...dizziness, fainting, increased breathing rate, increased pulse (heart) rate, skin rash and ...face, lips or eyelids.

...n side effects that usually do not require intervention unless troublesome or ...lude: overexcitement and hyperactivity, nervousness, restlessness, and trembling.

...erdose may include: chest pain, chills, fever, seizures, fast or slow heartbeat, ...amps, severe nausea or vomiting, unusual paleness, and coldness of skin or severe ...of these symptoms require calling parent or nurse unless student is unconscious ...It is extremely rare to need immediate emergency intervention; if Hannah ...are call (**911**).

...as needed with **Alupent, Brethine, Brethaire, Maxair, Tornalate, and**

...ed to relax muscles in and around the airways. They act rapidly. ...prevent exercise-induced asthma.

...Pediapred (a steroid) to reduce inflammation. ...witching, reduces inflammation, swelling of airways and ...rupt asthma episodes.

...ptly to parents and school nurse include: behavior

Read Receipts

- Read Receipts on a health plan provide a way for school staff that interact with a student to acknowledge the student's health plan
  - All teachers are added automatically
  - Additional staff that need to acknowledge the plan can be added
- The student's Medical Alert displays their health plan(s) with a link to view and acknowledge reading them
- Acknowledgements/Read Receipts can be viewed for each health plan

Read Receipts

Monitoring

Monitoring

Used when staff need to routinely monitor a student's health condition(s).

- Currently, monitoring supports Diabetes only, but can be expanded in the future to monitor a variety of conditions
- Staff can document the result of testing a diabetic student's carb levels, blood glucose levels, pump adjustments, and any required treatments
- Monitoring events can be 'one-off' (as needed) or scheduled to occur on a regular basis
- Monitoring events are shown in the Nurse's Daily Log

Medication Tracking

One of the most-requested health features!

- A student can have an unlimited number of attached medications
- 'Primary Reason for Giving' pulls from Health Concerns code set
- Active dates and time deliver records to the Daily Log

⚠ It is important to be consistent in the **units** throughout the medication screens

Health Concerns

Health Concerns

A much better way of tracking student health issues

- No longer needs to be text typed in to the Medical Alert
- Health concerns "replace" the Medical Alert
  - Concerns show up automatically in the Medical Alert

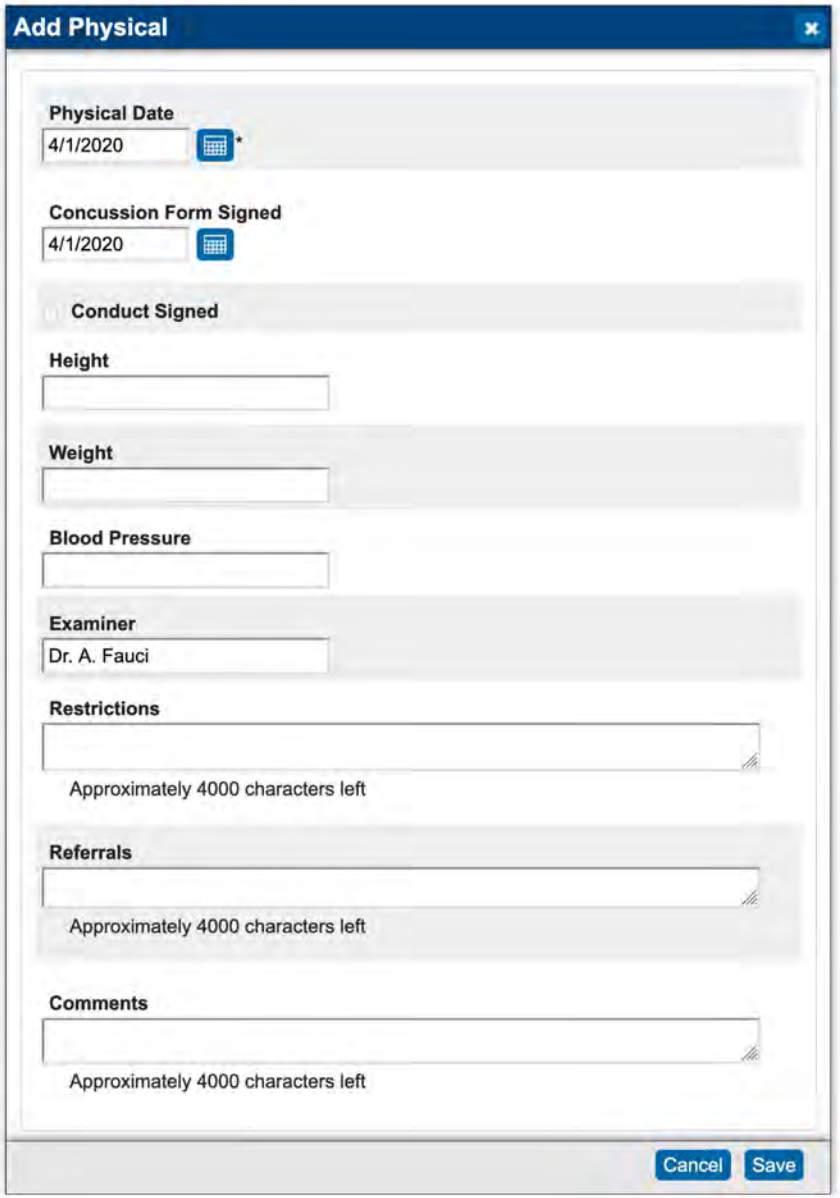
Physical, PE Waivers, Contact Log, and Other

Physicals

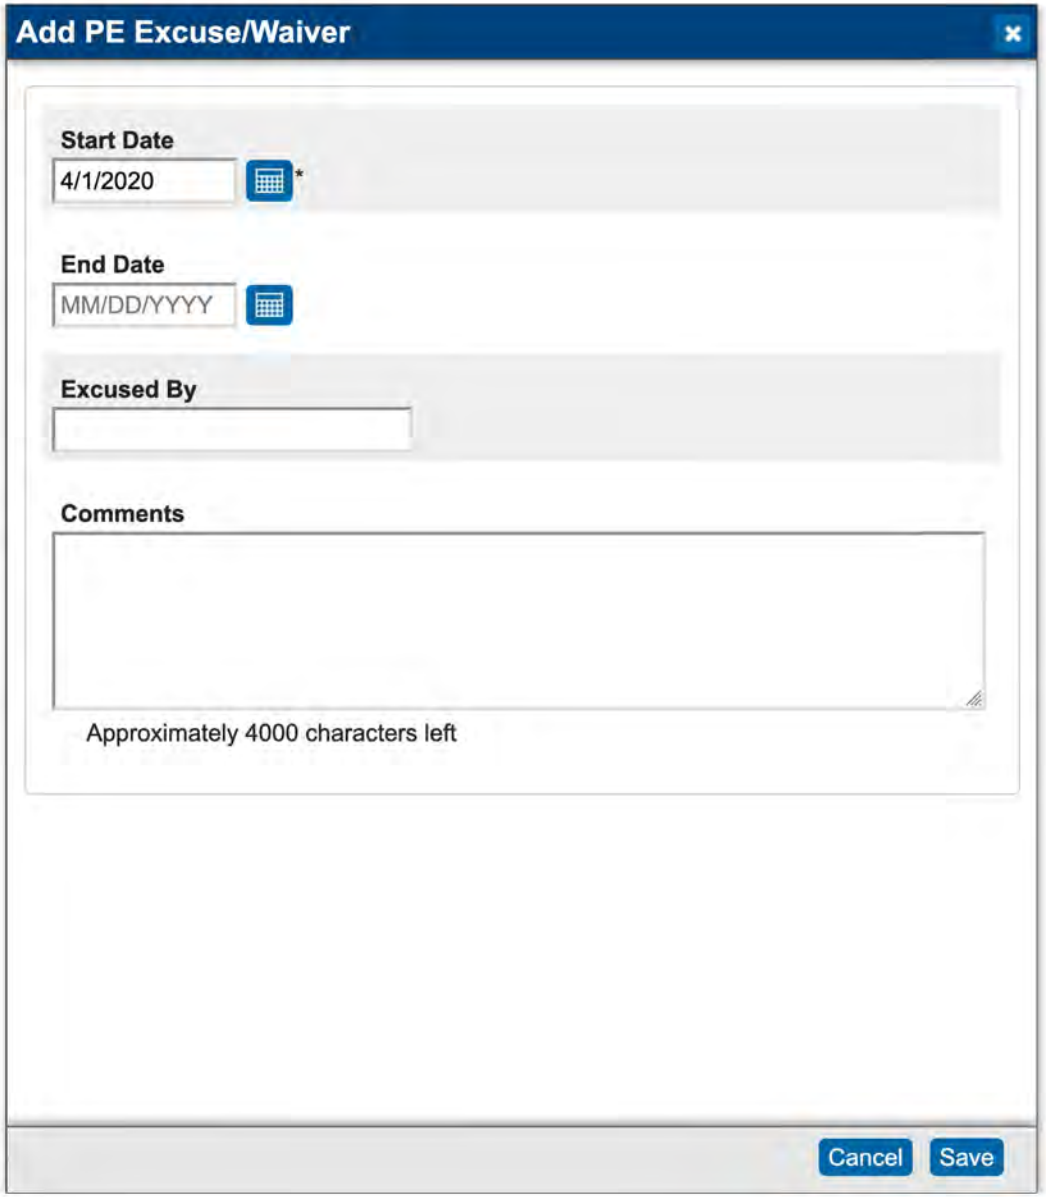
- Allows tracking of when students have physicals (typically to participate in sports)
- Can track which sport/coach requested the physical
- Can document any recommended restrictions



PowerSchool

PE Waivers

- Just a simple way of tracking PE waivers and the reasons for them.
- PE Waivers are visible to teachers on the teacher portal home page



PowerSchool

Contact Log

- Allows tracking of any conferences, calls, etc. concerning a student's health
- Group: Used to group like types of contact logs together.
  For example:
  - Type of communication (telephone, email, conference)
  - Type of person (Family, Medical personnel, staff)
- Need: What is the contact about? For example:
  - Attendance, general medical questions, screening results, Clarification of Doctor orders
- Medicaid Code: If billing to Medicaid, what code should be referenced
- Referred By: Who asked for the contact? Parent, another staff member, student, etc.

Daily Log

Daily Log – 'Home' Page for Nurses

- Default Filter to 'today' and to only show enrolled students
- Can look at current, future or past records
- Shows health records that are 'dated' transactions (Office Visits, Screenings, Monitoring, Physicals, Contact Log, Medication Doses)
- Records with no time are sorted to top by default
- Uses Group Security to determine which records to show

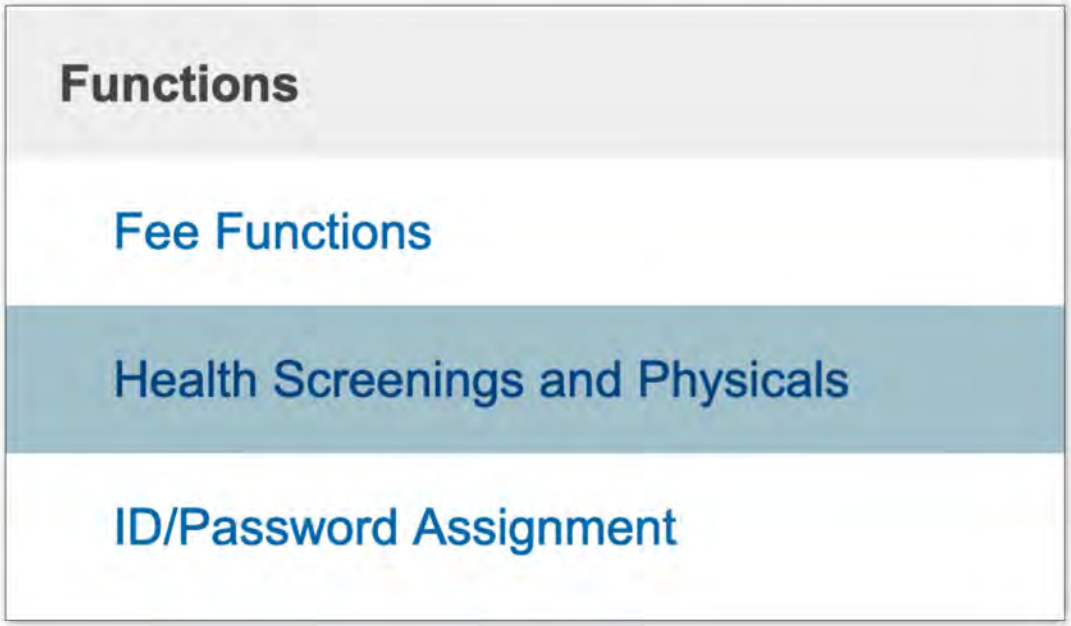
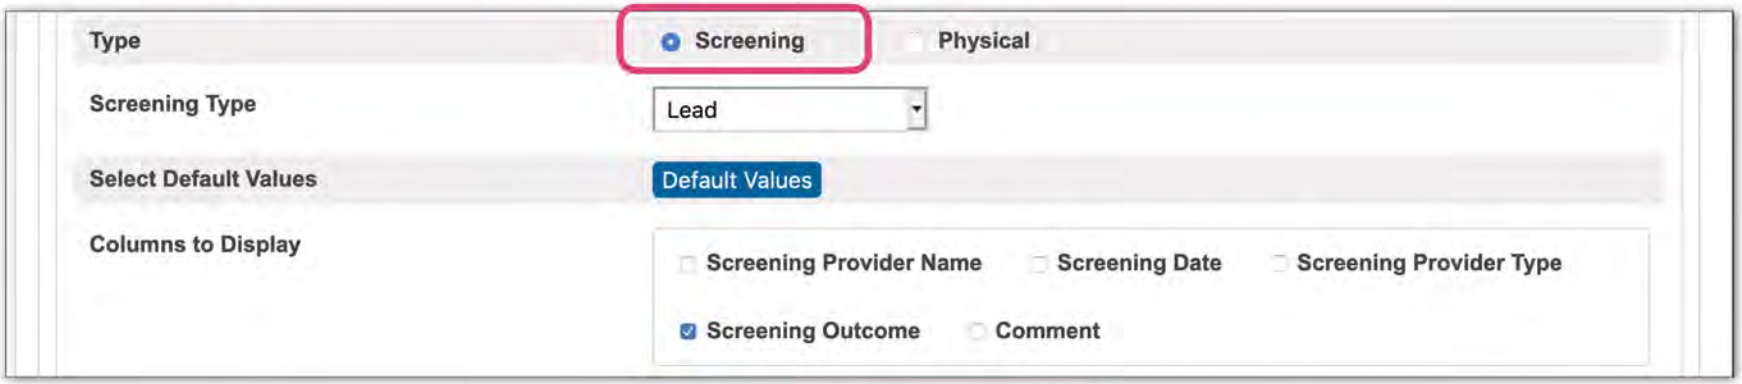
Health Screening Group Function

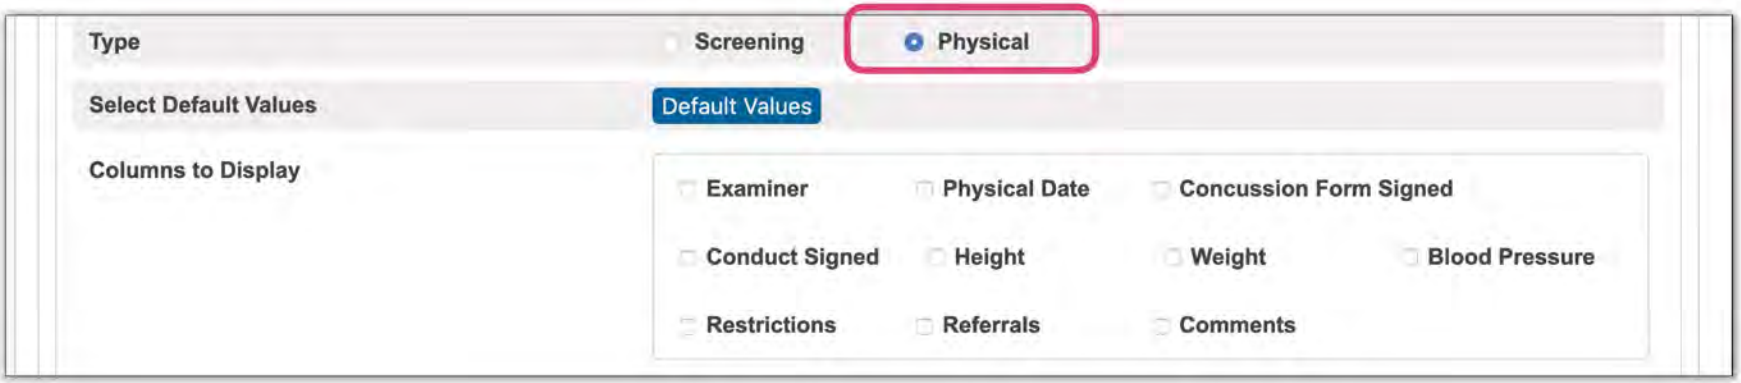
This feature has been updated to also support mass-adding of physical records for students



Health Screening Group Function

- Lead screening now available
- Switch 'Type' to Physical to mass-enter them





Tech Notes: Enhanced Health

All of the new health tables are accessible from Enterprise Reporting / APEX

- Remember that there is already a Health category for Enterprise Reporting that you can use to secure these reports

All Enhanced Health components support Change History
