

ALABAMA CTE CAREER READINESS INDICATORS

Effective 8/1/23, Revised 12/22/23

Career Readiness Indicators (CRI) are credentials/certifications made available to all students enrolled in a program where career and technical skill proficiencies are aligned with industry recognized standards. CRIs may not be available for all programs. Credentials provide proof that the student possesses the minimum skills required for entry-level employment. CRIs should be included in the student information file. Testing can occur at the discretion of the LEA Career and Technical Director depending on student readiness. Pre-assessments should be required. It is the responsibility of the Career and Technical Director to ensure each program has a well-planned method for determining the readiness of students to attempt certification exams to maintain a high rate of student success. It is strongly recommended that the method for determining the readiness of students to attempt certification exams be driven by program data, classroom performance, and skill acquisition within the student's pathway.

Career Readiness Indicators are listed in the grid in association with the Cluster and Program through which they are aligned. College and Career Readiness status will be granted for CRIs listed for that program. Programs must be declared by the LEA and school, as well as by the student.

Career Readiness Indicators are made available and offered to any career and technical education student who is enrolled and declared in a career and technical education program with sequenced courses that is aligned with a local, state, or national third-party credentialing agency to earn a program credential, certification, or license.

The Program Teacher, Career and Technical Director, and local program Advisory Committee should:

- review the Alabama State Department of Education (ALSDE) Career Readiness Indicators list to determine if there is an appropriate third-party credential or license available for the respective career and technical education program.
- select the CRI credential(s) that is best suited for the program, the students, and local industry needs.
or
- recommend an alternative third-party Career Readiness Indicator for approval if it is determined, based on local labor market demands, that the students and local industry will benefit from the alternate credential.

Recommendations for new CRIs must be submitted by December 31 each year by the local Career and Technical Director utilizing the CRI Submission Process through the Alabama State Department of Education. CRIs will be reviewed through the CRI Committee Procedure. The CRI list is updated each academic year. Always check the revision date of this document to be sure it is the most current list. **Highlighted credentials are new this year.**
