Architecture and Construction Cluster Program Guide

In the Architecture and Construction cluster, course work leads to careers in construction technology, electrical, heating, ventilation, air- conditioning, (HVAC), masonry, plumbing, technical design, utility line work and welding. Course content includes significant technical depth and incorporates engineering concepts and terminology. The Architecture and Construction cluster provides students with basic knowledge and skills within a safe and appropriate setting for student exploration and achievement. The active, structured, and stimulating environment simulates the workplace setting and enhances student ability to adapt to an ever-changing job market.

****Courses highlighted in yellow are shared with other clusters. See "Shared Courses" table on page 5 for additional details.**

Construction Technology Program (Must teach three courses from this program list within two years)			
Career Pathway Program	Courses in the construction technology program will ground the trainee in the basic knowledge and principles of carpentry and cabinetmaking. Students will become skilled in different phases of a project from start to finish. Once completing this course, the student will be able to interpret construction drawings, and frame walls, ceilings, and floors of a structure. Emphasis is placed on job safety, use of hand tools and stationary power tools, materials and hardware, various types of joinery, and component assembly and installation. This program covers content such as Building Materials, Cabinet Fabrication, and Advanced Wall Systems. This program aligns with NCCER standards.		
Course Number	Career Pathway Program Courses	Career Readiness Indicator (CRI)	In Demand Occupations

17049G1000	Safety and Health Regulations		
17006G1001	Wood Technology: 2D Design		
17006G1002	Wood Technology: 3D Design		

Electrical Program (Must teach three courses from this program list within two years)			
Career Pathway Program	Electricians install electrical systems in structures; they install wiring and other electrical components, such as circuit breaker panels, switches, and light fixtures, and they follow blueprints, the <i>National Electrical Code</i> ® and state and local codes. To prepare trainees for a career in the electrical field, this program utilizes NCCER’s comprehensive, 4-level Electrical curriculum that complies with DOL time-based standards for apprenticeship.		
Course Number	Career Pathway Program Courses	Career Readiness Indicator (CRI)	In Demand Occupations
17002G1002	Architecture and Construction Foundations	<ul style="list-style-type: none"> • Alabama Certified Employee (ACE) • Asphalt Roller – Skills for Success • Bulldozer – Skills for Success • Construction and Skilled Trade Assessment (CAST) • NCCER Core (module 6 is an elective and not require for CRI) • NCCER Electrical Level 1 • OSHA 30 • Skid Steer – Skills for Success 	<ul style="list-style-type: none"> • Industrial Electrician • Industrial Maintenance E&I Technician • Residential Electrician
17047G1001	Career Pathway Project in Architecture and Construction		
17017G1000	CTE Lab in Architecture and Construction

Career Pathway Program	Heating, Ventilation, and Air Conditioning Program (Must teach three courses from this program list within two years)		
	The increasing development of HVAC (heating and air-conditioning systems) technology causes employers to recognize the importance of continuous education and keeping up to speed with the latest equipment and skills. This program aligns with NCCER’s standards that have been designed by highly qualified subject matter experts with this in mind. This curriculum is recognized by North American Technician Excellence (NATE) and presents theoretical and practical skills essential to your success as an HVAC installer or technician.

17049G1000	Safety and Health Regulations		

Career Pathway Program	Masonry Program (Must teach three courses from this program list within two years)		
	The study of masonry is one of the world’s oldest and most respected crafts. Masonry construction existed for thousands of years. This program encompasses modules such as Mortar, Metalwork in Masonry, and Estimating; and aligns with NCCER standards.		
Course Number	Career Pathway Program Courses	Career Readiness Indicator (CRI)	In Demand Occupations

17008G1002	Masonry Laying Techniques		
17008G1001	Masonry: Mortar, Materials, and Installation		
17008G1003	Masonry: Residential		
12002G1003	Project Management		
17049G1000	Safety and Health Regulations		

Career Pathway Program	Plumbing Program (Must teach three courses from this program list within two years)		
	Most people are familiar with plumbers who come to their home to unclog a drain or install an appliance. In addition to these activities, however, plumbers install, maintain, and repair many different types of pipe systems. For example, some systems move water to a municipal water treatment plant and then to residential, commercial, and public buildings. Other systems dispose of waste, provide gas to stoves and furnaces, or supply air conditioning. Pipe systems in power plants carry the steam that powers huge turbines. Pipes also are used in manufacturing plants, such as wineries, to move material through production processes. This program aligns with NCCER’s four-level curriculum that covers topics such as Plumbing Tools, Types of Valves, and Potable Water Treatment.

17104G1012	Utility Line Workers Service Equipment		

Career Pathway Program	Welding Program (Must teach three courses from this program list within two years)		
	Welding is a highly skilled industry that can take you places all over the world. From ladders to aircraft carriers, from NASCAR to national defense, and from the laboratory to sales and repair, the varied welding industry impacts virtually every industry. Technology is creating more uses for welding in the workplace. For example, new ways are being developed to bond dissimilar materials and non-metallic materials, such as plastics, composites, and new alloys. Also, advances in laser beam and electron beam welding, new fluxes, and other new technologies and techniques all point to an increasing need for highly trained and skilled workers. This program aligns with NCCER's four-level curriculum covering topics such as Oxyfuel Cutting, Welding Symbols, and Stainless-Steel Groove Welds. NCCER's curriculum also correlates to the AWS standards and guidelines for an Entry Welder.

To meet the CCR Indicator as a CTE completer, a student must earn three (3.0) credits with the grade of a “C” or higher in CTE courses that are part of an approved CTE program of study. Additional requirements are outlined in [Memorandum FY22-2065](#).

This matrix is intended for general guidance on the CCR completer status and is subject to change. For all CTE programming information, please refer to the CTE Cluster specific Program Guide. It contains a list of approved CTE programs, valid course numbers, required prerequisite courses, approved Career Readiness Indicators (CRIs) and in demand occupations.

***Courses are listed in alphabetical order, not in sequential order.**
