

# Performance Level Descriptors

## Mathematics

### Grade 8

<b>Performance Level Descriptors (PLDs)</b>				
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Level 4</b>
<b>Policy Statement</b>	The student has a minimal understanding of grade-level standards and needs additional support at this level of learning as described in the Alabama Course of Study.	The student has a partial understanding of grade-level standards and is likely to need some additional support at this level of learning as described in the Alabama Course of Study.	The student has a strong understanding of grade-level standards and demonstrates the knowledge and skills at this level of learning as described in the Alabama Course of Study.	The student has an advanced understanding of grade-level standards and exceedingly demonstrates the knowledge and skills at this level of learning as described in the Alabama Course of Study.
The performance level descriptors describe what a typical student scoring at each performance level can do. A student who scores at a level would be expected to also be able to demonstrate the skills described in previous levels. A student would not necessarily demonstrate all the skills listed at a particular performance level on a particular test in order to score at that level.				
<b>Number Systems and Operations</b>				
8.NSO.1 8.NSO.1a 8.NSO.1b 8.NSO.2	<b>A student at this level</b> <ul style="list-style-type: none"> <li>recognizes irrational numbers as a category distinct from rational numbers.</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>identifies examples of irrational numbers and</li> <li>plots an approximation of an irrational number on a number line.</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>converts a decimal expansion that repeats into a rational number and</li> <li>orders and plots approximations of irrational numbers on a number line.</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>estimates the value of an irrational number to tenths.</li> </ul>

<b>Algebra and Functions</b>				
8.AF.3 8.AF.4 8.AF.4a 8.AF.4b 8.AF.5 8.AF.6 8.AF.6a 8.AF.6b 8.AF.7 8.AF.8 8.AF.8a 8.AF.9 8.AF.9a 8.AF.9b 8.AF.9c 8.AF.9d 8.AF.10 8.AF.11 8.AF.11a 8.AF.11b 8.AF.12 8.AF.12a 8.AF.12b 8.AF.13 8.AF.14 8.AF.15 8.AF.15a 8.AF.16 8.AF.16a 8.AF.17	<b>A student at this level</b> <ul style="list-style-type: none"> <li>chooses units of appropriate size for measurements of very large or small quantities;</li> <li>interprets the unit rate as the slope of a proportional relationship represented in a graph;</li> <li>finds the slope and y-intercept of a line using a graph; and</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>determines whether expressions are equivalent using properties of integer exponents;</li> <li>evaluates square roots of small perfect squares and cube roots of small perfect cubes;</li> <li>represents quantities in scientific notation;</li> <li>graphs proportional relationships and compares proportional and non-proportional relationships represented in the same way;</li> <li>derives the equation <math>y=mx</math> for a proportional relationship;</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>understands and applies the properties of integer exponents to generate equivalent numerical and algebraic expressions;</li> <li>uses square root and cube root symbols to represent solutions to equations;</li> <li>performs operations with numbers expressed in scientific notation;</li> <li>graphs proportional relationships and compares proportional and non-proportional relationships represented in different ways;</li> <li>explains why the slope of a non-vertical line is the same between any two points and derives the equation <math>y = mx + b</math> for the line;</li> <li>represents and solves multi-step linear equations in one variable and with rational number coefficients;</li> </ul>	<b>A student at this level</b> <ul style="list-style-type: none"> <li>applies multiple properties of integer exponents to generate equivalent numerical and algebraic expressions,</li> </ul>

	<ul style="list-style-type: none"> <li>distinguishes between relations that are functions and relations that are not functions and distinguishes between linear and non-linear functions.</li> </ul>	<ul style="list-style-type: none"> <li>understands that a solution to a system of two linear equations in two variables corresponds to the point(s) of intersection of their graphs;</li> <li>identifies and defines linear functions; and</li> <li>determines the rate of change and initial value of a linear function.</li> </ul>	<ul style="list-style-type: none"> <li>understands when linear equations in one variable have one solution, no solution, or infinitely many solutions;</li> <li>solves systems of two linear equations in two variables using graphing and substitution and interprets the results to solve real-world and mathematical problems;</li> <li>defines, evaluates, and compares functions in multiple representations;</li> <li>constructs and interprets functions to model linear relationships between two variables; and</li> <li>analyzes the relationship between two quantities represented in a graph.</li> </ul>	<ul style="list-style-type: none"> <li>identifies systems of two linear equations in two variables that have one solution, no solution, or infinitely many solutions, and</li> <li>evaluates, compares, and analyzes functions that model non-linear relationships between quantities in multiple representations.</li> </ul>
