This cluster prepares high school students with essential knowledge and skills for pursuing careers in the following three pathways: Computer Science, Cybersecurity and Infrastructure, Information Technology Support and Services.

Courses highlighted in yellow are shared with other clusters. See “Shared Courses” table on page 4 for additional details.

Career Pathway Program	Computer Science Program (Must teach three courses from this program list within two years.)		
	This pathway includes the study of theoretical algorithms, and the practical problems involved in implementing them through computer hardware and software. This pathway includes artificial intelligence, software engineering, programming, and computer graphics. The need for computer science as a discipline has grown as computers become more integrated into daily life and technology continues to advance. This pathway provides students with skills required for the workforce both now and in the future.

** LEAs must contact the ALSDE Computer Science specialist prior to utilizing the course codes listed to obtain information for required training and curriculum material.			

Career Pathway Program	Cybersecurity and Infrastructure Program (Must teach three courses from this program list within two years.) This pathway provides students with the skills necessary for protecting information technology infrastructure and networks, devices, and data from unauthorized access or criminal use and the practice of ensuring confidentiality, integrity, and availability of information. Cybersecurity is an enormous and growing field as consumers and businesses share data through online shopping and social media applications.

Career Pathway Program	<u>*Project Lead The Way (PLTW) – Computer Science</u> (Must teach three courses from this program list within two years.) Whether building apps to meet client needs or exploring cybersecurity, PLTW Computer Science engages students in interdisciplinary activities that not only build knowledge and skills in computer science, but also empower students to develop essential skills such as problem solving, critical and creative thinking, communication, collaboration, and perseverance. The program’s courses empower students with in-demand knowledge and skills they will use in high school and for the rest of their lives, on any career path they choose.

To meet the CCR Indicator as a CTE completer, a student must earn three (3.0) credits with the grade of a “C” or higher in CTE courses that are part of an approved CTE program of study. Additional requirements are outlined in [FY25-2048 Updates on Career and Technical Education Completer Status](#).

This matrix is intended for general guidance on the CCR completer status and is subject to change. For all CTE programming information, please refer to the CTE Cluster specific Program Guide. It contains a list of approved CTE programs, valid course numbers, approved Career Readiness Indicators (CRIs), and in demand occupations.
